SAFETY ISSUE RISK ASSESSMENT (SIRA) TOOL

1 Safety Issue Title:			
2 Define scope the SI:			
Description of Hazard:			
Description of Scenario:			
A/C type:			
Location:			
Time period under study:			
Other:			
3 Analysis of potential Accident Scenario			
3.1 Triggering event	3.2 Undesirable Operational State	3.3 Accident Outcome	
<p>Maintenance error</p> <p>Flight ops hazard</p> <p>Hazard on ground</p> <p>Triggering EVENT</p> <p>ATC hazard</p> <p>Weather hazard</p> <p>Technical hazard</p>			<p>Catastrophic accident (e.g. mid air collision)</p> <p>Major accident (e.g. overrun)</p> <p>Minor safety occurrence (e.g. turbulence bruises)</p> <p>Negligible</p>
4 Describe the barriers			
	4.1 To avoid the UOS	4.2 To recover before the accident	
5 Risk Assessment			
The estimated frequency of the triggering event (per flight sector/h)	The barriers will fail in AVOIDING the UOS...	The barriers will fail in RECOVERING the situation before the ACCIDENT.	The accident severity would be:
About every 100 sectors	Once in 1000 years	Practically always	Minor
1.0-01	1.0-03	1.0-00	
		UOS frequency:	Non-Accident frequency:
		1.0-03	1.0-00
6 Result			
6.1 Resulting risk class	Secure		
6.2 Comments on actions			

Fill in the grey areas!

“ Kun testituloksia,
riskiarviolausuntoja ja
sertifiointeja annetaan väärin
perustein, tehtävät
epäonnistuvat”.

- NASA:n laukaisujohtaja

Kenelle me
riskejä
arvioimme,
kehen voi
sattua?

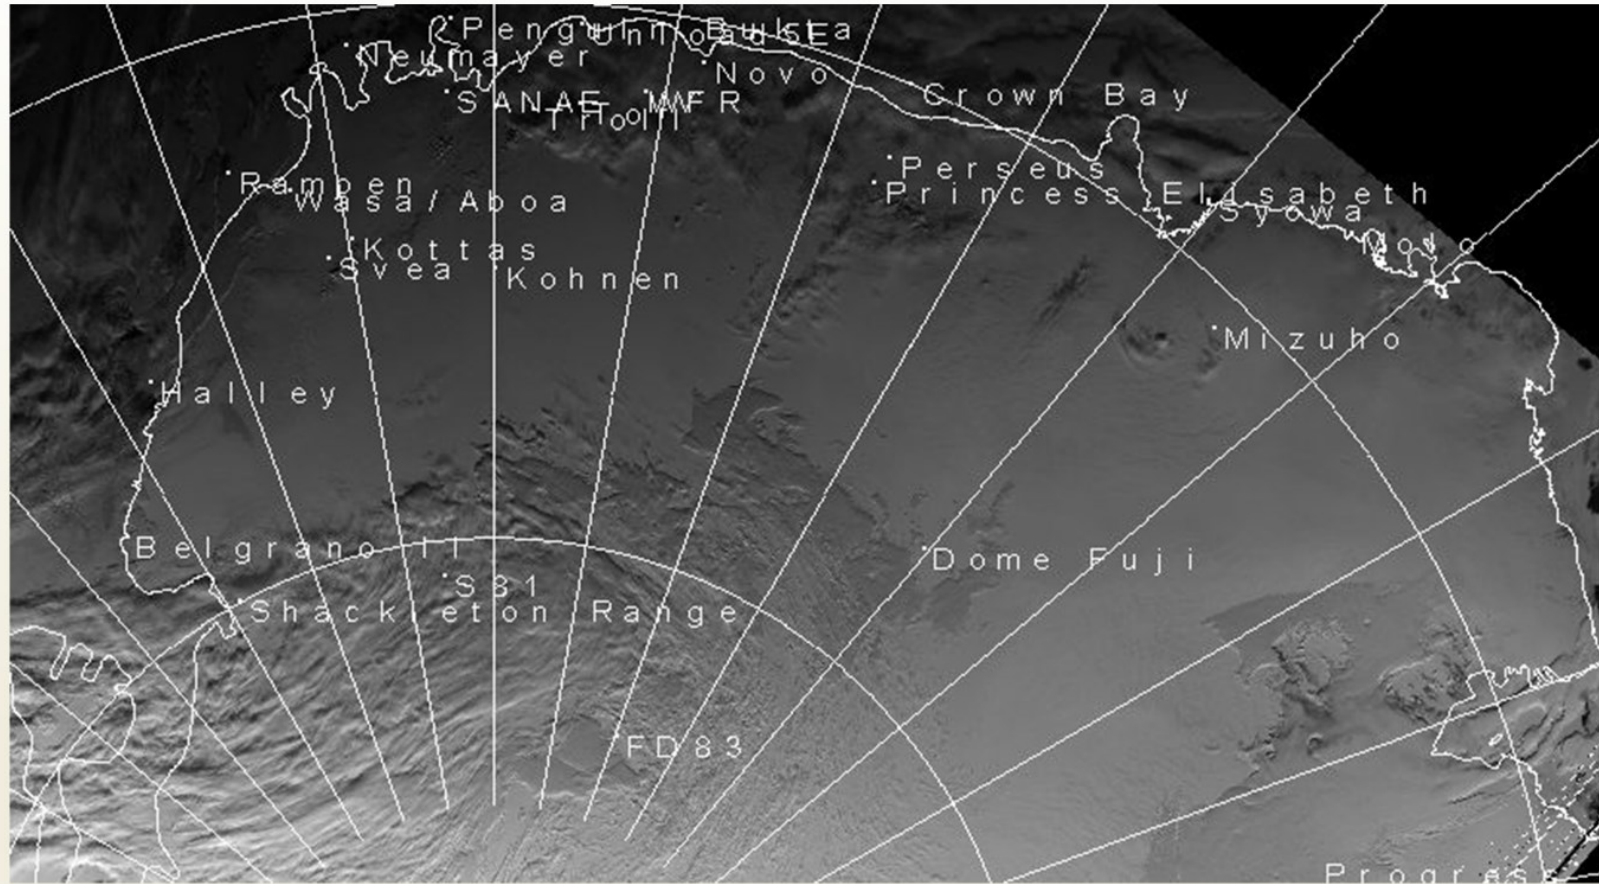

Mistä tiedot riskienhallintaan?

- SMS: OR, Hadarz Identification, Hazid Log, FDM, SAG kokoukset, cabin- raportit, auditoinnit, OQC, SIRA...
- Eurocontrol (SIB, Hazard etc.), asiakas, suurlähetystöt, UM, WFP, handlarit, PV, internet, yhdistykset/ yhteisöt, TRAFICOM, maksulliset turvallisuustietopalvelut, vakuutusyhtiöt, MoD, EBAA... ja kaverit..
